

Akhilesh Regmi

Computer Science & Engineering Student — AI & Machine Learning Enthusiast

Kathmandu, Nepal

+977 9866299700

Profile

Highly motivated Computer Science and Engineering undergraduate at Vellore Institute of Technology (VIT) with strong academic excellence and a focused interest in Artificial Intelligence and Machine Learning. Experienced in Python-based development, beginner-level machine learning projects, and collaborative problem-solving through hackathons and academic competitions. Actively seeking AI/ML internship opportunities to gain hands-on experience and contribute to meaningful, community-driven technology solutions.

Education

Vellore Institute of Technology (VIT)

August 2024 – Present

Bachelor of Technology (B.Tech) in Computer Science and Engineering

- Developing a strong foundation in programming, data structures, algorithms, and software engineering
- Exploring Artificial Intelligence and Machine Learning concepts through coursework and self-study
- Actively participating in hackathons and technical competitions

Rato Bangala School, Kathmandu

June 2022 – June 2024

A Levels

Grades: A*, A*, A*

- Demonstrated academic excellence with strong performance in mathematics and science
- Participated in math leagues, science fairs, and analytical problem-solving activities

Technical Skills

- **Programming:** Python
- **Artificial Intelligence:** AI fundamentals, problem modeling, logic-based systems
- **Machine Learning:** Supervised learning concepts, data preprocessing, model evaluation
- **Software Development:** Small-scale application development, debugging, algorithmic thinking
- **Other:** Hackathon collaboration, analytical thinking, continuous self-learning

AI / ML Projects

Student Performance Prediction System

- Built a machine learning model using Python to predict academic performance based on input features
- Performed data cleaning, feature selection, and basic model evaluation
- Strengthened understanding of supervised learning and data-driven decision making

Python Mini Applications

- Developed small-scale Python applications to strengthen programming and logical thinking skills
- Focused on clean code structure, input validation, and efficient problem-solving

Activities & Achievements

- Active participant in hackathons focused on innovation and teamwork
- Contributor to science fairs emphasizing practical implementation of theoretical concepts
- Participant in math leagues enhancing analytical and quantitative reasoning

Languages

- Nepali — Native
- English — Fluent
- Hindi — Conversational
